

Dear Friends and Supporters,

The future of Central Illinois hinges on the potential of our youth. Do they possess the skills and motivation to sustain the success this region has enjoyed? We must take action to ensure that they do. The Illinois Medical Association (IMA) envisions actively engaging students, but we require your help, support, and passion to achieve this goal. IMA continues to fulfill its mission within local school districts and through partner organizations.

Our Medical Club, which commenced a year ago, has been highly successful. OSF leads the program for seniors with minimal support from us, boasting an attendance of 40 students this year. Additionally, we are thrilled to announce the inauguration of our new **Business and Engineering Club** in collaboration with Bradley University, PSD150, and AICCP. This pilot program enrolled 25 students in its first year, and Bradley professors conduct the classes at Bradley University. We intend to refine and expand this initiative in the next academic year.

We persist in offering regular **tutoring programs** at PSD150 schools, constantly seeking opportunities to reach more students within our community. Our strong partnership with Bradley University has enabled Bradley students to teach at these locations, and we aim to further this relationship in additional areas.

We are now reaching out to the local community and parents who have benefited from our non-profit organization for assistance.

Your contributions will enable us to continue providing essential support to some of our community's most vulnerable children. The need is pressing. Donations will ensure the continuation of these no-cost classes for most children. You may allocate your funds to specific areas, such as STEM Programs or operational expenses, including paying teaching staff or covering general operating costs.

On behalf of the IMA Board of Directors and those we serve; we extend our sincere gratitude for your consideration.

Sincerely,

Mike Render
